### G-BOX2

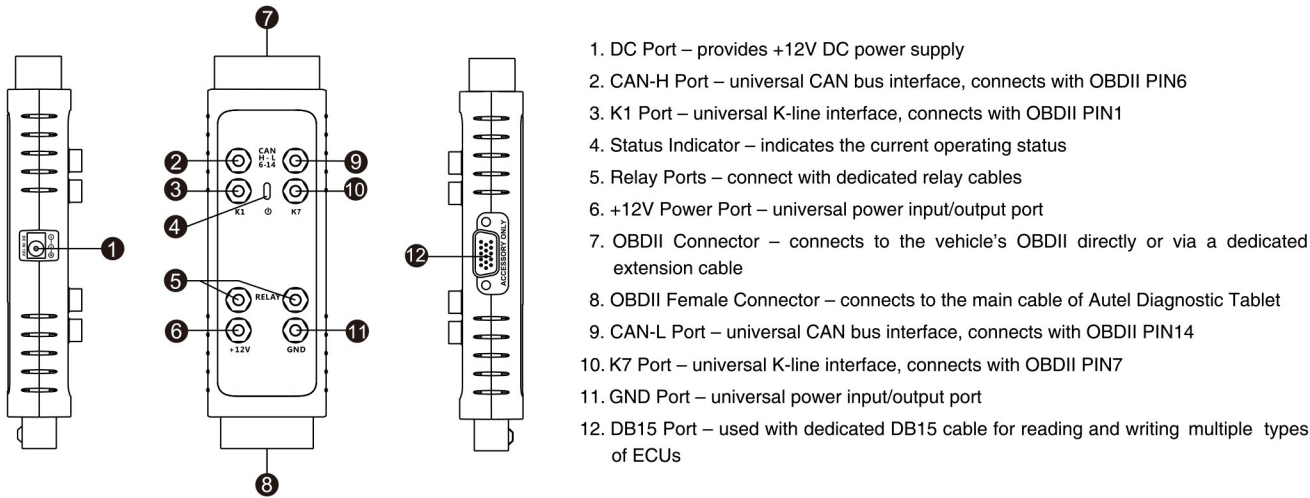

Thank you for purchasing AUTEL tool. Manufactured to a high standard, our tool will, if used according to these instructions and properly maintained, give you years of trouble-free performance.

#### Product Description

The G-BOX2 realizes fast mode on vehicle and bench when all keys of Mercedes-Benz vehicles using the DAS3 EIS/EZS are lost. The use of the G-BOX2 reduces the time needed and eliminates the process of insertion and removal.

The G-BOX2 can read and access most engines manufactured by Bosch including EDC/MEx17 series engines used in BMW and Volkswagen vehicles. This capability supports the ability to perform adaptations when all keys are lost and engine is replaced.

The G-BOX2 is compatible with the Autel's advanced diagnostic tablets supporting IMMO and Key Programming functions.
